

# Dynamics and Precision through Linear Drives

21

Newsletter

*The power of linear drives  
for high precision milling*

Steadily growing standards in view to manufacturing quality and productivity of machine tools ask for new concepts.

**Kuhlmann** realizes these requirements with an innovative model range. Highly dynamic linear drives and glass scales care for highest precision during positioning of the axes. As the drive works touchless, no wear occurs. In contrast to conventional drives backlash does not occur, even after years.

**The result is a workpiece with highest precision and excellent surface quality.**

- ▼ **Highly dynamic linear drives**
- ▼ **Highest precision through Diadur glass scales**
- ▼ **Wearless and maintenance-free drive system**
- ▼ **High speed and acceleration**
- ▼ **Excellent performance and positioning accuracy**
- ▼ **Low noise through touchless power transmission**
